INSTITUTIONAL POLICY ON WASTE MANAGEMENT

Introduction

The policies developed for the conservation and management of the environmental resources signify one of the quality initiatives adopted by the college in ensuring the vision statement of the institution. The policies and initiatives for the conservation of energy, environment and green campus activities are implemented by the collaborative efforts of NSS Unit, Nature Club and Energy club of the institution.

The policies and initiatives aimed at conserving energy, protecting the environment, and promoting green campus activities are designed to foster a positive attitude toward nature. It also aims to instill a sense of responsibility in student teachers to safeguard natural resources. As future nation builders, student teachers are encouraged to pass on these values to younger generations in schools through various initiatives and activities.

The eco-friendly waste management initiative reflects the principles of a Green Campus, aiming to extend learning beyond the classroom. It seeks to cultivate a sense of responsibility and commitment under the motto "My Waste, My Responsibility," both within the college and in the broader community.

Objectives of the Policy

- To help student teachers recognize the significance of the environment and identify its critical issues.
- To train student teachers to raise awareness about environmental conservation among the public.
- To safeguard and preserve ecological systems and natural resources both within and beyond the campus.
- To collaborate with the local community to promote environmental protection practices and energy-saving strategies.

- To encourage student teachers to adopt sustainable practices in their daily lives and teaching methodologies.
- To organize workshops and campaigns on renewable energy, waste management, and sustainable development.
- To integrate environmental education into the curriculum, fostering eco-consciousness among student teachers.
- To promote tree plantation drives and green initiatives as part of institutional activities.

Waste Management Committee

There is a committee to ensure the realization of the policy on ensuring effective waste management headed by the Principal which monitors meaningful implementation of waste management in the institution.

The following are the members of the committee:
